

Full Client and Webi Documents Percentage Report Overview

Author: Jai Gupta

Report Name: Full Client and Webi Documents Percentage

Purpose: Report shows the percentage of Full Client and Webi reports present in a Business Objects reporting system.

Report is based on two free hand SQL data providers. This report can also be built using a universe.

Requirements: Connection to Business Objects Repository along with User ID and Password

How to Use:

1. Open Full Client and Webi Percentage.rep
2. Go To Data → Edit Data Provider → “Corporate Docs”
3. Create a new connection to you repository database or use an existing one if you have
4. After changing the Data Provider connection click on “Run”
5. Repeat steps 2,3 and 4 for “User Docs” Data provider also
6. Report is ready for use

Report Tabs:

Corporate Documents: Shows % distribution of Full Client and Webi reports in Corporate Documents

User Documents: Shows % distribution of Full Client and Webi reports in User Documents

Note:

- ◆ User Documents that are not retrieved by the users are only considered in the report.
