

Orphan Binds.

These are binds that have not been removed before the rule was deleted. So the system still thinks they are valid and you can't remove them.

MBOM_BAAN Task and Rules in 230_DE2

Information Steward Task BaaN_BOMs fails in 230_DE2, works OK in Helen Stover's project.

There are 3 MBOM Migration rules that should be deleted from 230_DE2. Bill renamed them to "Do Not Use." They give an "error" that isn't really an error. Can't see bindings, but bindings can't be removed to remove rules.

Helens project results.

MBOM_BAAN_OPNO_003

MBOM_BAAN_OPNO_003				
Description: 0 operation on BOMs, excluding phantoms. Joins to filtered list by parent item.				
Author: H0004255 Approver: Data Insight Administrator

When looking above at the results tab and the rules bound to the table I see rules that need to be.

Every attempt to remove the rules or un-bind them from the project result in the same error.

The above shows the rule has no bind. The number in the error is 2 because I tried binding the rule again. In an attempt to write over the old bind. All it did was make it worse. Now there are two orphan binds that need to be removed. You can see the orphan rule binds below when looking at the table level.

			T\$CPHA_Phantom

Posted a question on SAP's community. <https://answers.sap.com/questions/155738/how-do-you-remove-a-rule-that-thinks-its-still-bou.html>

So I decided to go to the SQL server corp635 actual tables and see what could be done.

```

/***** Script for SelectTopNRows command from SSMS *****/

```

```

SELECT [rule_id]

I did find the table that has the rule GUID and name in the Information Steward Repository.

The problem with this is that if we remove these. You'd need to find everything that's associated with the GUID. It could cause more harm than good.

Maybe we could do this with Query Builder

Rule name	Rule ID	Line Number	GUID	
MBOM_BAAN_OPNO_002 2040_MBOM_IS_MARA_MARC_MAST	1179	42175	6E416DA0-6D81-4162-BA00-164F208ED9FF	79809 rows
MBOM_BAAN_OPNO_003_CORRUPT	1200	67266	1D74C359-91A5-42A7-AE6A-6808D0D88F13	
MBOM_BAAN_QANA_001	1178	42091	F593C758-9848-4323-B934-4B776CBE6945	
MBOM_BAAN_QANA_003	1201	42498	29AD4815-0DE2-493B-8E94-E599A0835E57	
MBOM_BAAN_OPNO_002_CORRUPT				
MBOM_BAAN_QANA_005_CORRUPT	1203	67368	17A0A778-C364-4598-B2F2-140057A54A7F	
MBOM_MM_Phantoms_001_CORRUPT	1205	67438	F8AC804E-9A1F-4352-A8F0-1FF8CE217EF5	
MBOM_MM_Phantoms_002_CORRUPT	1206	67475	062BA10A-4FFC-4152-9402-438CF791941C	
PIR_00_GeneralData_PRDAT_001				
VAL_VEND_00_ADDRESS_CITY1_001				
VAL_VEND_00_ADDRESS_COUNTRY_001				
VAL_VEND_00_ADDRESS_POSTCODE1_002				
VAL_VEND_00_ADDRESS_REGION_001				
VAL_VEND_00_ADDRESS_SORT1_001				
VAL_VEND_00_ADDRESS_SORT2_001				
VAL_VEND_00_ADDRESS_STRAS_001				
VAL_VEND_00_CONTROL_STCD1_002				
VAL_VEND_00_CONTROL_STCD2_002				
VAL_VEND_00_INITIALENTY_BUKRS_002				
VAL_VEND_00_INITIALENTY_EKORG_002				
VAL_VEND_00_PURCHASINGDATA_INCO1_001				
VAL_VEND_00_PURCHASINGDATA_INCO2_001				
MATL_Qupware_Stock_Room_SLOC				

So I took it another step and started looking for the actual bind to remove.

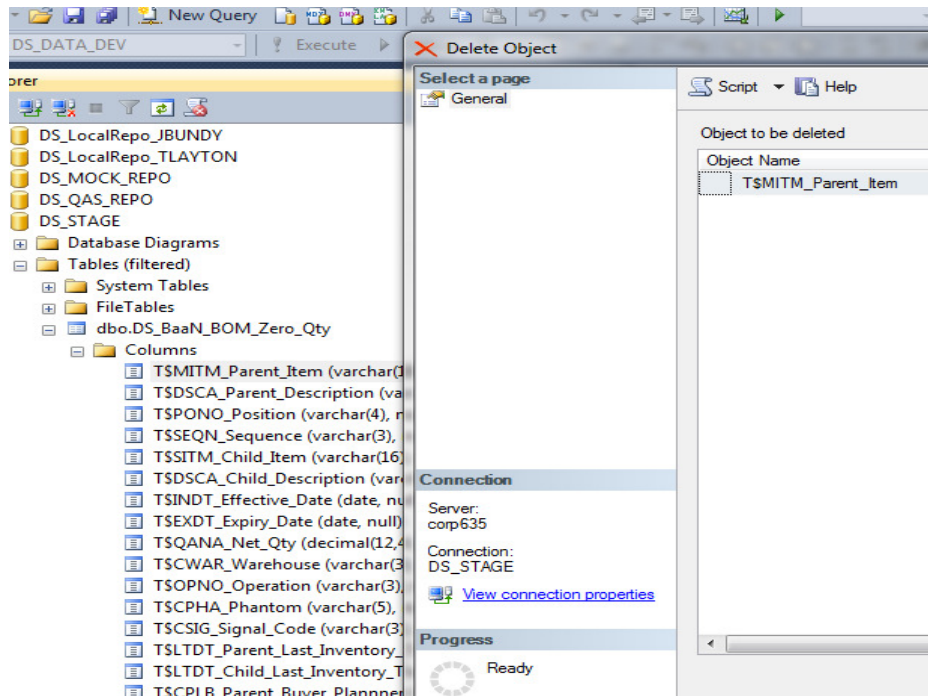

I had no luck finding the bindings.

So I think we might need to make an OSS note.

So I thought I'd delete the columns located in the SQL Server. That the rule is bound to if it's not in use by any other rule.
